

Results Analysis work for the Scholar Support Programme
Programme wise weighted scores

Results analysis work – for the determination of weak subjects

The results analysis work involved statistical analysis of the end semester University Examination results of the regular and non-self financing courses of affiliated colleges (Government and aided colleges) of the Kerala, M.G., Calicut and Kannur Universities. Dr. K.M. Abraham IAS, Principal Secretary (Higher Education and Social Welfare) to the Govt. of Kerala appointed a two member team comprising Dr. K.P. Jaikiran as Nodal Co ordinator (Assistant Professor in Geology) and Dr. T. A. Anand (Assistant Professor in Hindi) to work under the supervision and guidance of Dr. P.K. Velayudhan, Additional Director of Collegiate Education, Kerala. The team visited the four Universities and interacted with the office of the Controller of Examinations and collected data pertaining to the newly introduced Choice Based Credit and Semester System (CBCSS) from the respective Computer Centres. As the University of Kerala joined the CBCSS late in 2010, a lag in the availability of digital data has occurred and hence the results of the first and second semesters of the B.A/B.Sc/B.Com/BBA programmes were only considered for the analysis.

Major programmes were selected from the first and second semester B.A/B.Sc/B.Com/BBA of the Kerala, Calicut, Kannur and MG Universities. The results data from the University of Kerala pertains to 2010 and 2011 examinations, that from the others relate to the 2009 and 2010 Examinations. The list of programmes selected for the analysis is given below:

B.A.

English, Malayalam, Hindi, Sanskrit, Economics, Political Science and History

B.Sc

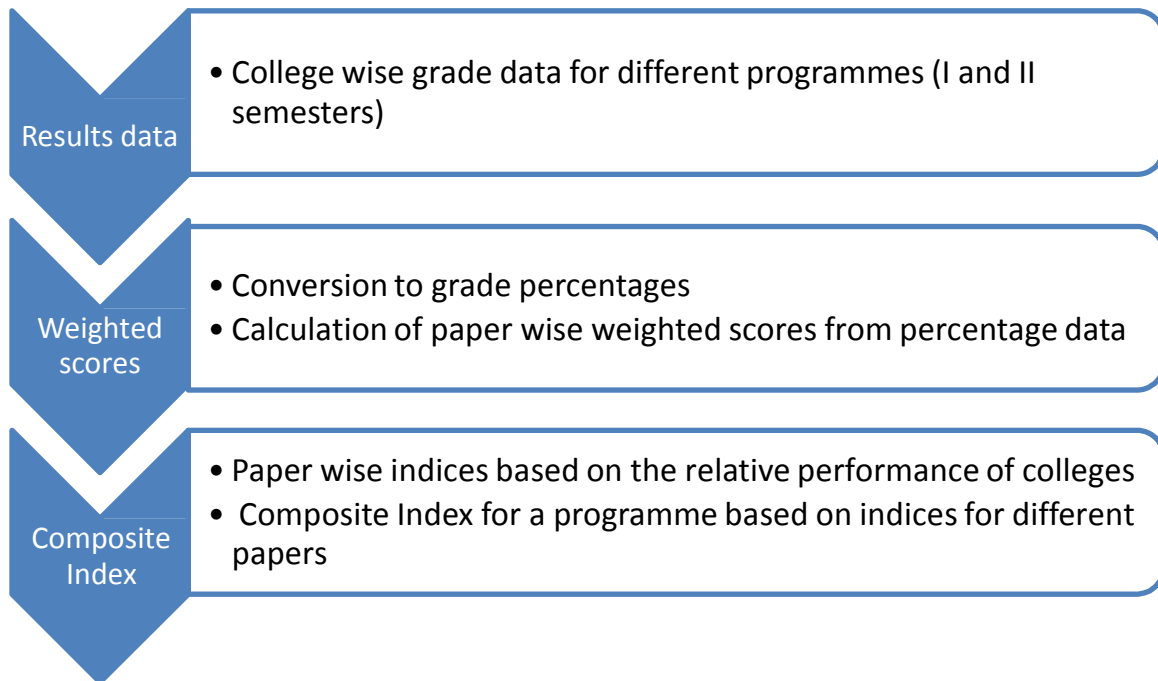

Mathematics, Physics, Chemistry, Computer Science, Botany and Zoology

B.Com and BBA

Methodology

The procedure adopted for the analysis involved calculation of percentage grades and weighted scores for each subject of a programme (College wise) and determination of composite indices for each programme based on subject wise weighted scores. The methodology developed by **Iyengar and Sudarshan (1982)** for the calculation of Composite Index from multivariate data was used. The value of weighted score varies between a minimum of 5 (in case all students get E grade) and a maximum of 35 (in case all students get A grade). The value of Composite Index varies between 0 and 1. Such an indexing enables ranking of colleges based on performance in a programme. While the indices help to determine paper wise student performance in different colleges, the composite index is a good tool for benchmarking the colleges.

Flow chart showing the methodology of the results analysis

a. Calculation of percentage grades

From the number of grades (A-E) obtained for different papers in a programme, the percentage grades were calculated first.

Calicut University First Semester Degree Examination 2009-10 - Weighted Scores
